<i>Can I SMS ?</i>	internal phone	Android phone <sup>(1)</sup>	Android phone <sup>(3)</sup>	1. Android phone <sup>(1)</sup> 2. internal phone
<i>Can I make phone calls?</i>	-	Android phone <sup>(1)</sup>	Android phone <sup>(3)</sup> + CallCenter software	1. Android phone <sup>(1)</sup> 2. internal phone <sup>(2)</sup>

<sup>(1)</sup> An Android v4.2 or higher phone is required.

You will need to install the "JABBLA BT" app on the Android phone. Download it directly on the phone using the following link: <https://www.jabbla.com/en/frequently-asked-questions/>

1. Set up the BT Phone connection in Mind Express: choose "Enable BlueTooth" (Smart/Zingui) or "external phone" mode (Mobi 3/Tellus 5).
2. Scan for our device on the phone and establish a BT connection (passkey '1111').
3. Launch the "JABBLA BT" app and configure it to auto connect to our device.

Note: all BT connections should be set up using Mind Express, not by using Windows or third-party BlueTooth applications. Check user manual for more information.

<sup>(2)</sup> This note applies to Tellus 5 only.

Minimum requirements: Mind Express v4.3 // Tellus 5 tray tool v3.0.0.69.

Serial numbers < T5 1286: GSM upgrade required, check Dealer Website for more information.

<sup>(3)</sup> SMS: choose "BlueTooth Smartphone" in Mind Express *Phone* menu.

Phone calls: install CallCenter utility and choose "CallCenter App" in Mind Express *Phone* menu. Check Dealer Website or user manual for more information.
